

Duck Plate Craft

Make your very own duck from materials found around your house!
(If you can't find or print the materials, you can make your own!)

Materials:

- Paper Plate
- Print outs of feet and head
- Scissors
- Stapler or tape
- Colored pencils/Crayons/Markers

Instructions:

1. Take a paper plate and fold it in half (making a half circle). Staple or tape it closed to prevent it from opening. This will be the body of your duck. The flat edge of the plate will be the top (back) of the duck and the rounded edge will be the bottom (belly) of the duck.
2. Using scissors, cut along the outline of the duck head and feet.
3. Color the body, head, and feet to match a duck species.
4. Attach the head to one end of the folded plate and the feet to the bottom with a staple or tape.
5. Enjoy!
