

Duck Life Cycle

Directions: Draw a line between the vocabulary word and its matching definition.

Drake	A structure that birds make to lay their eggs in
Hen	A young duck
Duckling	Sitting on eggs to keep them warm so they develop
Nest	A female duck
Incubate	A male duck

Directions: Put the duck life cycle in the order they happen by placing numbers 1-6 next to each step; 1 being the beginning of the cycle and 6 being the end.

<p>The hen lays 6-13 eggs.</p>  <p style="text-align: center;">3</p>	<p>Ducklings stay with their mom for about 6 weeks before they go out on their own.</p>  <p style="text-align: center;">6</p>	<p>Drake and a hen meet.</p>  <p style="text-align: center;">1</p>
<p>The eggs will hatch, all within 24 hours of each other.</p>  <p style="text-align: center;">5</p>	<p>The hen and the drake build a nest.</p>  <p style="text-align: center;">2</p>	<p>The hen incubates the eggs for 27-35 days.</p>  <p style="text-align: center;">4</p>
